

The media file panel will open upon clicking the “add images and other files” button, where you can browse and upload files. *****Please use compatibility mode when saving all files using MS Office 2010.**

Once uploaded and visible in the file list on the media files panel, link a file by using the following syntax in the body of a wiki page:

```
{{:filename.doc|Text name of document}}
```

so it could be (using files listed in the image above as an example):

```
{{:iaascharter.pdf|IaaS Working Group Charter}}
```

After hitting save on the page you are editing, the file will show up for others to click and view.
